

AutoNebula is steering to Gods Own Country KERALA
for the next connected transport meetup
"IGNITING AUTOMOTIVE STARTUPS"
meetup in Cochin on Saturday, 8th July 2017.

AutoNebula has partnered with Kerala Startup Mission and Maker Village for this event where we seek to recruit top-notch startups and entrepreneurs who have disruptive ideas in the connected transport space or IoT in the automotive segment to present their business plans / ideas!

Our industry experts will review your product/concept and you could stand a chance to get seed funded and be a part of our incubation program.

TO REGISTER:

You can share your connected transport ideas, concepts or business models on pseagal@autonebula.com and a short pre-screen interview will follow.

Shortlisted entrepreneurs will be invited to attend the meetup. The objective of the meetup is to provide a platform for prospective startups.

Look forward to having a great participation and interactive session.

AutoNebula is the only exclusive incubator cum accelerator initiative in India. Our virtual incubation model has facilitated nearly 15 startups in a short span of 1 year.

Most of our startups are in various phases of traction and they complement each other.

We are presently scouting for startups in (not limited to)

Artificial Intelligence
E-Vehicle Energy Alternatives
Prognosis & Vehicle Security focuses

Mobility
Infotainment
Diagnostics & logistics

Kerala Startup Mission (KSUM)

Kerala Startup Mission (KSUM) formerly known as 'Technopark Technology Business Incubator', is India's first and Most successful Non-Academic Business Incubator, hosted and housed inside Asia's Largest IT Park Technopark. Apart from the role of an incubator, Kerala Startup Mission is the nodal agency for the government to implement the Kerala Technology Startup policy in the state.

Maker Village

The Electronics Incubator is a joint initiative between, Ministry of Electronics and Information Technology(MeitY) and Indian Institute of Information Technology and Management-Kerala (IIITM K), the nodal agency of the project, Kerala Startup Mission and Govt of Kerala to promote consumer electronics based innovation and set up labs and innovation centers that focus on the current trend and emerging technologies of disruptive nature to bring India to the forefront of innovation in the electronics space.
